S-SHAPED

ERGONOMIC SEATING
The revolutionary S-Ergo system is the WORLD’S FIRST S-SHAPED ERGONOMIC SEATING designed according to the body curve. Patented in the US, European Union, and many other countries, the S-Ergo system is capable of simultaneously RELIEVING PRESSURE, ADJUSTING and STABILIZING SEATING position and REDUCING DOWNWARD SLIDING.

HOW DOES IT WORK?

TRADITIONAL SEAT
Causes High risk of decubitus ulcers because of pressure points concentrating on hipbone area.

S-Ergo SEAT
The S-Ergo system (intelligent s-shaped ergonomic seating) provides efficient pressure relief by spreading weight over a greater area. This also increases stabilization and reduces sliding.

THE AEGIS MICROBE SHIELD’S PERMANENTLY BONDED ANTI-MICROBIAL BARRIER UPHOLSTERY PROTECTS FROM ODOR, STAINING AND DETERIORATION FROM BACTERIA, FUNGUS AND OTHER MICROORGANISMS.

EXTENDED ARMREST
The Extended armrest design provides a larger seating area whilst maintaining an overall narrower chair width.

ERGONOMIC ARM PAD
The wider arm pad is ergonomically designed to provide a comfortable elbow support. The extended width also permits the user to use the pad for elevating him/herself in and out of the chair.

FOLDABLE AND EXTREMELY COMPACT
The S-Ergo series folds easily. It becomes extremely compact after folding, making it ideal for storing and for traveling.

CONSTRUCTION
Aircraft-grade aluminum allow frame provides a lightweight structure and anti-oxidation properties.

The rear-wheel design supports 14”, 20”, 24” standards for multiple selection.
S-ERGO 125

SUITABLE FOR VIPS OR OFFICIAL PATIENTS, INTER-WARD MOVEMENT AND NEURO AND SPINAL SURGERY SECTIONS.

FLIP-BACK ARMREST
Flip-back armrest offers greater convenience. The user can easily transfer himself from wheelchair to bed, car seat or sofa. (Perfect help for caretakers)

ERGO HANDRIM
The innovative Ergo handrim offers handling comfort and assist with wheelchair propulsion.
Patents awarded in multiple territories.

SWING-AWAY FOOTREST
Inward/Outward swing away footrest for added convenience. This function is ideal for tight areas.

MICRO-ADJUSTMENT
RECLINABLE BACKREST

The backrest-armrest coupling structural design reclines 95, 100 and 105 degrees. Tool-free swift adjustments for going back and forth between the pre-selected angle degrees.

- **Working angle (95°)**
  the best position to work and stabilised body.
- **Moving angle (100°)**
  allows effort-saving flexibility and dynamic display.
- **Resting angle (105°)**
  offers body and mind relaxation resulting in replenising energy.

RIGIDIFYING PUSH-BAR

The foldable and extendable rigidifying push-bar strengthens back support. It is also easier to push and steer the chair.

MVP-502

PATENTED ANTI-SLIDING V-SEATING SYSTEM
When reclining, the innovative structure will form a V-shaped seat that keeps the hip area from sliding. This will effectively relieve pressure and reduce the risk of decubitus ulcers.

RIGIDIFYING PUSH BAR
The rigidifying push bar strengthens back structure and makes it easy to push and steer the chair.

Strap-tension adjustable backrest and seat.

AXLE-TRAVELLING FOOTREST
Axle-travelling system makes the footrest stretch during elevating.

MULTI-FUNCTIONAL ERGONOMIC ARMREST
The backrest-armrest coupling structural design provides automatic armrest movement while reclining. The armrest moves up when the backrest is moved back up. These features help to keep users in a position that assists their comfort and safety. The armrest is also height-adjustable and easy to flip back.

VIP-515

HEIGHT ADJUSTABLE AND FLIP-BACK ARMREST
Innovative armrest structure enables height adjustment at ease for comfortable seating; flip-back armrest provide easy transfer.

INWARD/OUTWARD SWING AWAY FOOTREST
Inward/outward swing away footrest improves convenience for tight areas, which also allow easier access to the chair.

INTELLIGENT CENTER-OF-GRAVITY WEIGHT SHIFTING SYSTEM
The VIP-515 is a revolutionary lightweight folding tilt-in-space wheelchair, with a tilt range from 0 to 35 degrees. It uses exclusive gas struts for an intelligent center-of-gravity weight shifting system to maintain stability while the chair is tilted up.

This unique system allows center of gravity to shift between front and rear wheels during tilt-in-space, providing the steadiest structure possible, along with greater safety as well.

ERGONOMIC HEADREST
Ergonomically designed headrest offers great support for shoulder and neck and relieve pressure.

FOLDABLE AND COMPACT
VIP-515 is one of the lightest foldable tilt-in-space models in the market. Its compact design is convenient for storing and travelling.

ANTI-TIPPER
To keep wheelchair stable when tilting.

HARNESS
Click and clip harness prevent from forward sliding.

SAVER KP-45.5

SAVER is an ideal wheelchair for OUTDOOR MID-LONG DISTANCE JOURNEYS, as it is equipped with SUPERIOR PRESSURE RELIEVED SYSTEM and strong power base.

INDEPENDENT SUSPENSION RESPONSE (ISR)
The sophisticated independent suspension allows the absorbers to accurately predict and avoid road shock, significantly improving stability and comfort when riding the wheelchair outside.

OFF-ROAD TRIAL
Saber successfully travelled over 1,000 km during the road test, and passed the drop test 6,666 times, demonstrating a superb off-road safety.

ALUMINUM-ALLOW FRAMES
The lightweight design reduces the pressure on the battery, extending driving range.

STREAMLINED SHAPE
The import of drainage concept effectively prevents against mud.

FLIP BACK ARMREST
Make it easier to transfer into the chair.

SPLENDID LED LIGHTING
300 LUX high brightness LED lights, saving 75% energy and offering 30 times efficiency comparing with a normal light.

ENJOY THE RECLINING FUNCTION
KP-45.5 and KP-45.5T are equipped with mechanical reclining function; KP-45.5TR offers power reclining.

THE TILT-IN-SPACE FUNCTION RELIEVES BOTTOM PRESSURE
KP-45.5T / KP-45.5TR equipped with power tilt function, that provides excellent pressure relief and also ensure good postural support.

RED ISR SUSPENSION FOR USERS WEIGHING BETWEEN 110 -135 KGS
Standard specification for KP-45.5T / KP-45.5TR

**Karma Blazer KP-31**

THE KARMA BLAZER is a new INDOOR-OUTDOOR POWER CHAIR that offers essential configurations with premium adjustments that exceed its value.

**INDOOR AGILITY**

With only 60 cm total width and 100 cm total length, Blazer is highly maneuverable in tight area. While working, 44 cm seat to floor height make it easy to approach the desk-top, thus increase one’s work function and interaction with others.

**OUTDOOR PERFORMANCE**

With maximum 330 W motors, Karma Blazer proposes a maximum speed of 10 km/hr and 36 km driving range (with 60 ah battery). The 9” caster and 14” rear wheel ensure the outdoor safety under 10º slope and 6 cm curb environment. It also offers a wide range of manual and powered options.

STANDING WHEELCHAIR

POWER KP-80

THE ERGO STAND STANDING WHEELCHAIR is a COMPACT POWER WHEELCHAIR to help you with your daily activities. With ergo stand, you can STAND UP INDEPENDENTLY AND DRIVE AROUND EASILY.

The standing function is for indoor use only and for mid-short distance journeys.

Standing can activate the main circulation systems and help to maintain physical and mental health.

- Activates circulation system and improves cardio-pulmonary function.
- Helps prevent decubitus sores.
- Improves bladder function and decreases urinary tract infections.
- Reduces contractures and anchylosis.
- Prevents osteoporosis.
- Improves quality and independence of life.
Causes High risk of decubitus ulcers because of pressure points concentrating on hipbone area.

**HOW DOES IT WORK?**

**TRADITIONAL SEAT**
Causes High risk of decubitus ulcers because of pressure points concentrating on hipbone area.

**S-Ergo SEAT**
The S-Ergo system (intelligent s-shaped ergonomic seating) provides efficient pressure relief by spreading weight over a greater area. This also increases stabilization and reduces sliding.

**SAFE AND COMFORTABLE S-SHAPED ERGONOMIC SEATING**
Provides effective pressure redistribution by spreading weight over a greater area, helping to prevent the development to pressure sores.

**FITS YOUR BODY SHAPE**
To stand up after sitting for a long period of time, you not only need a wheelchair that you can have confidence in, but also one which can fit your body. Ergo Stand II is equipped with three levels of seat width, three levels of seat depth, five levels of armrest height, four levels of knee support combined with seven levels of footplate height lead to a happy experience.

**FRONT WHEEL DRIVE**
Ergo Stand is an agile front wheel drive wheelchair. The minimum turning radius is only 67 cm, thus allowing for movement and turning around in the smallest of the space. The front wheel drive also allows the center of gravity of the chair be the same as that of the human body while standing, thus it provides firmer standing experience.

**POWER RECLINE FUNCTION**
The power recline function provides a wide angle adjustment of 80°~120° excellent back support. In a reclining position, the user can redistribute the weight on the buttocks, reposition his or her body to increase comfort and reduce stress.

**SAFE AND COMFORTABLE S-SHAPED ERGONOMIC SEATING**
Provides effective pressure redistribution by spreading weight over a greater area, helping to prevent the development to pressure sores.

**FITS YOUR BODY SHAPE**
To stand up after sitting for a long period of time, you not only need a wheelchair that you can have confidence in, but also one which can fit your body. Ergo Stand II is equipped with three levels of seat width, three levels of seat depth, five levels of armrest height, four levels of knee support combined with seven levels of footplate height lead to a happy experience.

**KNEE SUPPORT**
Knee support feature supports lower limbs, stabilizing the centre of gravity and preventing accidental sliding:
- Adjustable height of knee support with three levels.
- Depth and width adjustment of knee support system.
- Depth and angle adjustment of knee support pad.

**FLIP-BACK ERGONOMIC ARMREST**
- The armrest is height-adjustable and can be flipped back when the user is to be moved.
- Wider ergonomic armrest pad provides stable and comfortable elbow placement.
- Five armrest height adjustment levels; from 19 cm to 27 cm.

**EQUIPPED WITH PIONEERING SAFETY CONTROL, REDUCING RISK WHEN STANDING**
What about emergency situation? Ergo Stand equipped with the safety control, which is separated from the main circuit system, so the user can return to the sitting position regardless of the status of the controller or the motor.
(Slight power is required for this function).

**RIDING AND BRAKES**
The maximum riding speed is 10 km/hr in sitting mode. The speed will slow down to half of the normal speed in standing mode. (For flat road riding only)

**Karma reserves the right to modify information herein without further notice.**

Battery is not part of the product, might change as per local country specifications and availability.
ERGONOMIC WHEELCHAIR

KP-10.3S

Suitable for SHORT DISTANCE JOURNEYS and for both INDOOR AND OUTDOOR USE.

Causes High risk of decubitus ulcers because of pressure points concentrating on hipbone area.

The S-Ergo system (intelligent s-shaped ergonomic seating) provides efficient pressure relief by spreading weight over a greater area. This also increases stabilization and reduces sliding.

HOW DOES IT WORK?

TRADITIONAL SEAT

S-Ergo SEAT

The 75 cm turning radius allows you to manipulate the wheelchair in small spaces.

Flip back armrest.

Adjustable armrest height.

Tool free adjustable backrest angle (95° & 109°)

LET’S GO!

Easy tool-free disassembly. The maximum weight per piece is 26 kg, and equipped with quick battery release so it can easily be put in a car trunk.

OPTIONAL ACCESSORIES

QUICK RELEASE ATTENDANT CONTROLLER

Enables maneuvering switches from the user to attendant in seconds.

UNIT: cm

KP-10.3S

KP-12T

For children suffering from CEREBRAL PALSY or MUSCULAR DYSTROPHY.

WHY IS THE POSITIONING SEAT IMPORTANT?
‘Positioning’ is an important issue for children suffering from Cerebral Palsy, as a comfortable and safe sitting position can arouse his or her physical potential to interact with people. If the seating potential to interact with people. If the seating position is neglected, the child’s spine and body shape will be negatively affected, which might cause medical problems in the near future.

MULTI-FUNCTION FLEXIBLE HEADREST
Forward, backward/upward, downward/in, out, tool-free adjustment, offers flexible support and helps to stabilize the position of the child’s head.

LATERAL TRUNK SUPPORT
Allows 90° and 180° lateral adjustment, offers easy access for carers. Easy to adjust for upward, downward and in/out, providing optimal trunk support.

PROTECTIVE LATERAL SEATING PADS
Allows 90° and 180° lateral adjustment, offers easy access for carers. Easy adjust for seat width, 7 section forward/backward adjustment, maintains the shape of the child’s pelvic curve, and prevents deformation of the pelvis.

THIGH SEPARATOR
It can be adjusted forward/backward without tools.

PELVIS BELT
Prevents forward sliding stabilizes the pelvis.

ANTI-TIPPER, FOR SAFETY ENHANCEMENT

FLIP BACK ERGONOMIC ARMREST
Designed for smooth lateral transfer, such as access to the chair.

EASY TOOL-FREE DISASSEMBLY, BURDEN FREE WHEN TRAVELLING
The heaviest part weighs less than 23 kg, allowing parents and child to travel easily.

CAREFREE SEATING
Perfectly suited to the shape of a child’s body, depth can be adjusted from 12.5” to 15”.

TILT IN SPACE
It can relieve pressure in the hipbone area, avoid inflammation of the pelvis and lowers the risk of developing pressure ulcers. It can also provide stability and safety when travelling on a downhill path.

MULTI-FUNCTION FLEXIBLE HEADREST
Forward, backward/upward, downward/in, out, tool-free adjustment, offers flexible support and helps to stabilize the position of the child’s head.

LATERAL TRUNK SUPPORT
Allows 90° and 180° lateral adjustment, offers easy access for carers. Easy to adjust for upward, downward and in/out, providing optimal trunk support.

PROTECTIVE LATERAL SEATING PADS
Allows 90° and 180° lateral adjustment, offers easy access for carers. Easy adjust for seat width, 7 section forward/backward adjustment, maintains the shape of the child’s pelvic curve, and prevents deformation of the pelvis.

THIGH SEPARATOR
It can be adjusted forward/backward without tools.

PELVIS BELT
Prevents forward sliding stabilizes the pelvis.
